MORE THAN JUST A DOOR...

Here is your inspirational guide to achieving an architecturally-designed garage door. Gone are the days of the old roller door, replaced with garage door design to suit today's modern homes.

This guide features a range of garage door designs that have been created using DECO's range of aluminium products. Whether you want to add a striking architectural element to your new build or looking to enhance and renovate an existing door, our products offer a stylish and functional solution that will undoubtedly impress and enhance your curb appeal.

EFFORTLESS,
BEAUTIFUL LIVING

ENJOY THE NATURAL BEAUTY
OF TIMBER COMBINED
WITH THE EASE AND
DURABILITY OF ALUMINIUM

Garage Door: DecoBatten® QuickClick® 46 x 25mm
Screening: DecoBatten® one-piece 40 x 40mm
Finish: DecoWood® Curly Birch

This guide offers inspiration only. DECO does not fabricate or sell garage doors, rather we work with expert garage door fabricators and installers who can custom design and build a garage door to suit your requirements. Get in touch with our team for a list of our garage door partners in your state.

DECOBATTEN

DecoBatten® is our lightweight aluminium batten system. It's unique patented QuickClick® two-piece design allows for complete customisation as well as simple installation. Select from a range of batten shapes and sizes to achieve the perfect look to suit your design.

Choose from over 30 beautiful and durable DecoWood® powder coat finishes for a realistic timber look that never needs painting or staining. Or select from our range of concrete, weathered steel or solid powder coat finishes.

DECOCLAD

DecoClad® delivers a sleek, modern cladding solution, providing your home with a sophisticated, architectural look. Our range of DecoClad® profiles along with our DecoWood® and other powder coat finishes, mean there are endless combinations to complete your design vision.

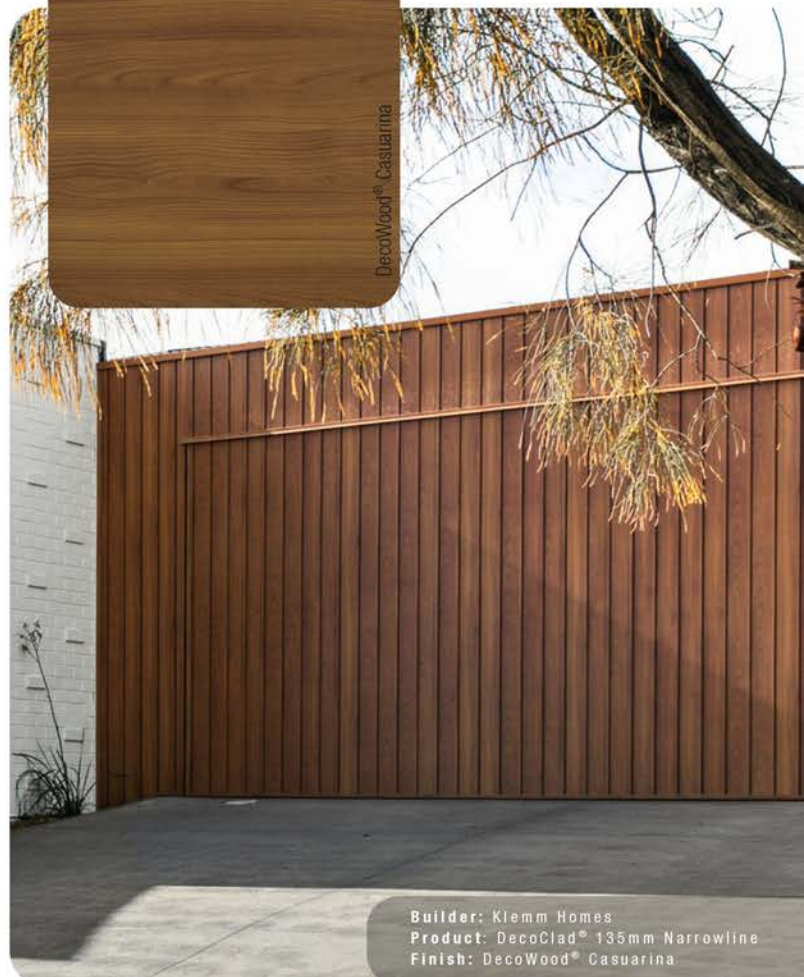

Minimise visible joins across the door thanks to DecoClad's 6.5 metre long cladding boards, which also offer efficient installation thanks to the patented interlocking board design with pre-punched fixing holes.

TILT D O O R S

Tilt doors are single panel garage doors that tilt open via power arms fixed to the sides. These power arms act as a series of pulleys that are connected to extension type springs. Tilt doors can be made in a wide variety of styles and designs.

WHY SELECT A TILT GARAGE DOOR

Simple, Streamlined Design

Tilt doors offer a clean, single-panel look that suits a minimalist or traditional home style.

Cost-Effective Option

With fewer moving parts and straightforward mechanics, tilt doors are often more affordable to purchase and maintain.

Ideal for Low-Ceiling

They require less internal headroom, making them a practical choice for garages with limited overhead space.

SECTIONAL

D O O R S

Installers: All Coast Garage Doors
Product: DecoBatten® QuickClick® 46 x 25mm
Finish: DecoWood® Curly Birch

Sectional garage doors consist of multiple horizontal panels or sections, interconnected by hinges. These panels smoothly ascend along tracks when the door is activated, moving up and overhead.

WHY SELECT A SECTIONAL GARAGE DOOR

Maximises Driveway Space

Sectional doors open vertically, allowing cars to park close to the garage without obstructing the door's movement.

Excellent Insulation

Sections can come with insulated panels, helping to regulate internal temperatures and improve energy efficiency.

Strong Security Features

Their robust construction and tight sealing system provide enhanced protection for your home.

AL ALISA & LYSANDRA

GARAGE DOOR HIGHLIGHT.

"It's not just a finish; it's a game-changer that has elevated the aesthetics of our home. DecoWood® has become an integral part of our design choices, and we couldn't be happier with the results."

Alisa & Lysandra, Design Duo
